

Healthy Living Hygiene

In the following examples how do the playworkers ensure the children in the setting follow good hygiene practices:

- When playing with natural resources such as bark and mud?
- When handling animals? Before a cooking activity?
- Before snack times?

Task

Get the children involved in discussing some of these issues and involve them in designing a poster or information leaflet.

Design a checklist to use when working or playing with animals. This may involve information for off site activities.

Check the relevant policies on a regular basis.
