

# Inclusive Practice

## SLC 1 – Interaction – Environments

Please note: the SLC cards have been designed to be worked through in order from cards 1 – 6.

How does your environment lend itself to different opportunities for meaningful interaction? The play space we create can influence interactions for example, creating a cosy den when we can whisper to one another or share a quiet story, open space for children to run together and play tag, a loose parts corner for children to share the resources etc.

### **Task**

Use the environmental audit below, to review your play space and reflect on the opportunities you provide to promote interactions.
